

BUILD A ROBOT

WHAT YOU'LL NEED:

Empty tin cans

Robot graphics, printed

Scissors

Adhesive backed magnets

Assorted screws, bolts, and washers

1. Thoroughly wash and dry tin cans. Watch for sharp metal where the cans were opened.
2. Print robot graphics on 8 1/2" x 11" paper or cardstock (print enough for everyone!). Cut out each of the elements with scissors.
3. Apply a small adhesive magnet to the back of each robot element.
4. Attach magnets to screws, bolts, and washers for additional robot parts.
5. Set a timer and have everyone start building their robots at the same time. When the buzzer goes off, each person describes the robot, its name, and its special power or ability.
